# Creatuity Custom Maintenance Documentation
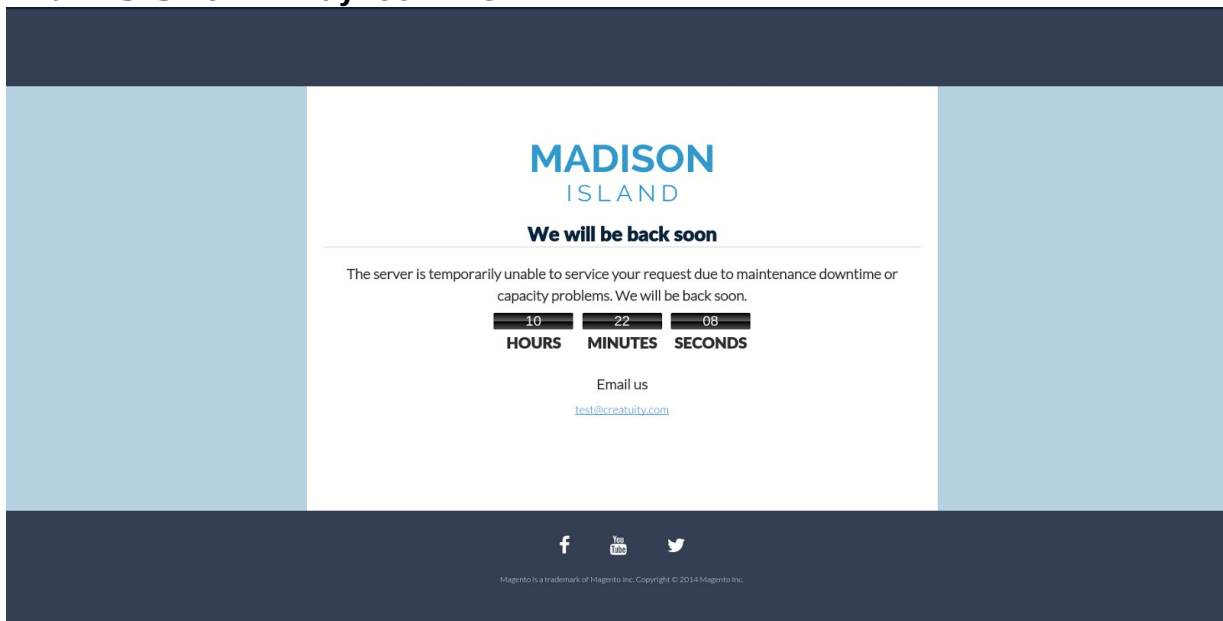

About this module

This module allows you to customize maintenace page view. Thanks to this feature your page can have maintenance page that is fully responsive, configurable and easy to change!

This is how the default page does look like:

**And this is how it may look like:**

Configuration of the counter

1. There are two steps that you have to do:
   - Check server date by typing date in terminal
   - Having in mind server time, add in maintenance.flag file date or hour when you exptect that maintanace mode will be disabled
2. maintenance.flag possible date formats
   - Only time:
     - **H:i -> 16:00**
     - **H.i.s -> 07.08.37**
     - **hh space? meridian -> 4 pm**
     - **HH MM II -> 070837**

   - Date and time:
     - **Y-m-d H:i:s -> 2015-01-10 04:25:48**
     - **Y-m-d H:i -> 2015/01/10 04:25**
     - **Y-m-d -> 2015/01/10**
     - **d/m/Y H:i:s -> 2015/01/10 04:25:48**
     - **10-Jan-15 15:52:01**
     - **mm "/" dd H:i -> 1/10 10:00**
   - **d-m-Y -> 10-1-2015**
     - **m -> March**

Configuration

1. Go to: Admin->System->CREATUITY->Custom Maintenance

2. You should see four areas:
   a) Preview (there's a button that will generate preview of your maintenance page – section visible only on storew view scope)
   b) General (here you can pick logo anc color of maintanace page for each website/store/store view)
   c) Contact on Maintanance Page (add you email address so that your client can easily reach use even if your site is temporarily unavailable)
   d) Social Media (add links to your social media account, those links will be displayed in the footer)

This feature allows you to configure your maintanance page in the way that social media links, logo or contact information will be displayed. Also your customers will have very clear information about when the page will be back. What's more you can pick your own colors that will corespond with your site!

Preview

You can always preview how your maintanance page will look like for particular store by clicking on **Preview** button. Remember to save config at first! Preview button is visible only on store view level.

Google Analytics support

Right now you are able to track how long maintenance mode has been active and how many people saw it! You just have to perform these steps:

- set Google Analytics Tag (Page Title) in module configuration :
    - System -> Configuration -> Creatuity -> Custom Maintenance -> Google Analytics Tag (Page Title)
- set google Analytics account in Magento configuration:
    - System -> Configuration -> Sales -> Google Api -> Enabled : YES
    - System -> Configuration -> Sales -> Google Api -> Enabled : Your google Analytics Id
- rebuild creatuity's maintenance configuration
